

Louvre Value Configuration

- To calculate approximately the amount of NXT-GEN or TC Containers or accessories that can be accommodated on a Topstore Louvred Panel, or part thereof, take the LV (Louvre Value) of the container or accessory and divide it in to the NL (Number of Louvres) per panel. To determine the number/size of Louvred Panels required to locate specific quantities of containers, simply reverse the above process.
- To calculate the exact configuration, see diagram below.

TC Containers are suitable for both the metric blue and imperial grey louvred panels, however the NXT-GEN Containers are better suited to the metric blue louvred panels.

IMPERIAL LOUVRED PANELS
